

FutureYou AI – Project Summary

◆ Introduction

FutureYou AI is a web-based application that analyzes a student's daily habits and predicts their future performance and career direction.

◆ Objective

- * To analyze student habits
- * To provide personalized suggestions
- * To guide career decisions

◆ Methodology

The user enters study hours, screen time, sleep, hobby, and interested domain. The system calculates a score based on these inputs and provides:

- * Performance status
- * Future prediction
- * Career suggestion
- * Graphical analysis

◆ Technologies Used

- * HTML
- * CSS
- * JavaScript
- * Chart.js

◆ Features

- * Habit analysis
- * Score calculation (0–100)
- * Career prediction
- * Hobby-based insights
- * Bar graph visualization

◆ Advantages

- * Easy to use
- * Provides quick insights
- * Helps improve productivity

◆ Limitations

- * Uses basic logic (not real AI)
- * No data storage

- ◆ Conclusion

FutureYou AI helps students understand how their habits affect their future and guides them toward improvement.
